- *Directions* -

Insert a strip of material 1½ inches wide under the guard bar in each of your three cloth folders. Push the material through to the small end, and pull through. Now slowly draw each folder down each strip. Start braiding like braiding hair. Leave folders on each strip while sewing on new strips of material. Sew new lengths on a bias, with as flat a seam as possible. Make a braid 26 inches long, measure off 24 inches of braid. Bend the 24 inches of braid in half, lacing the two braids together at the bend. This forms the center of your rug. Lace your rug like you lace your shoes going back and forth under each loop. Lace on wrong side.
